BREAKS A RIB.

Mrs. R. S. Byrnes (a sister of Mrs.
John E. Miles), of Lexington, attended
the marriage of her niece to Prof.
A. M. Wilson* on Saturday. While ar-
ranging some floral decorations for
the house, Mrs. Byrnes slipped and fell,
her side striking upon a flowerpot, break-
ing a rib. Surgical attention was
at once rendered. Being suf-
fering considerable pain, Mrs. Byrnes is
doing very nicely.

"REGULAR AS THE SUN"
is an expression as old as the race.
No doubt the rising and setting of the
sun is the most regular performance in
the universe, unless it is the action of
the liver and bowels when regulated
with Dr. King's New Life Pills.
Guaranteed by all druggists. Price 25
cents.

BAD ACCIDENT.

While at work on a scaffold, at the
residence of Mr. John R. Sower, on
Wilkinson street, on Monday, Mr. Jas.
Gordon, a tinner, had the misfortune
to have a ladder slip from under him,
throwing him with his side on the
granitoid pavement, breaking three
ribs, so that one of them protruded
from the side.

Dr. N. M. Garrett was called and
removed the splinter of rib from his
side and adjusted the fracture.

Mr. Gordon was doing as well as
could be expected at last accounts.

large part of it went to the grounds
of the new capital, where short
speeches were delivered and an in-
spection of the building entered upon.

Col. Geo. B. Harper, president of
the Business Men's Club, and Gov.
Beckham did the honors.

Responses were made by Mayor R.
W. Bingham and Mr. R. S. Brown.

The train was late and remained
here only about an hour.

Owing to the freight wreck, near
Lexington, the train did not pass here,
on the return trip, until after mid-
night.

FLAG FORK.

The tobacco men have about all de-
livered their 1906 crop at the pool
house and are very busy topping this
year's crop.

Mr. Henry Hulette, of Hemp Ridge,
visited his brother, Mr. J. C. Hulette
and family, last Saturday and Sun-
day.

Miss Florence Woodside, who began
her school the 5th of this month, is
now at home very sick. It is hoped she
may soon recover and continue
her school.

Miss Mary Hulette attended church
at Pleasant Ridge, Sunday, with her
friend, Mr. Sam North, and sister,
Miss Elizabeth North.

Mr. Wesley McQuillen and wife, of
Bagdad, attended church Sunday at
Pleasant Ridge.

Rev. C. M. Benight preached an ex-
cellent sermon on the subject, "And
the common people heard him gladly."
He did not begin the prostrated
services, as was hoped, on account of
his wife's illness, but we are very
happy to know she is recovering and
hope she will soon be well. Bro Benight
is a good preacher and is great-
ly loved by the people of Pleasant
Ridge.

The Ladies' Aid Society meets again
next Saturday evening at Lebanon, at
3 o'clock. Every one interested is in-
vited to attend.

Lost—A young man, who lived near
Lebanon Church, who called on Miss
Hulette. He found and taken to Mr. J.
P. Hulette's the finder will receive a
reward.

Miss Myrtle North and parents vis-
ited her cousin, Miss Susie Slattery,
and parents, Sunday last.

BLACK EYES.

BOAT HOUSE AND LAUNCH GO
TO BOTTOM OF RIVER.

The boat house and launch of Mr.
Henry F. Lindsey went to the bottom
at their mooring, on the South Side,
on Wednesday.

A pontoon, upon which the boat
house rested, on the north side, was
stove in by some unknown cause, and
carried both house and launch to the
bottom.

The boats were raised shortly after
their ducking. The launch was un-
hurt. The pontoon was repaired and
all is well.

I'll stop your pain free. To show
you first—before you spend a penny—
what my Pink Pain Tablets can do,
I will mail you free, a trial package
of them—Dr. Shoop's Headache Tab-
lets, ...ceralgia, Headache, Toothache,
Period pains, etc., are due alone to
blood congestions. Dr. Shoop's Head-
ache Tablets simply kill pain by coag-
ing away the unnatural blood pres-
sure. That is all. Address Dr.
Shoop, Racine, Wis. Sold by all drug-
gists.

STUCK NAIL IN FOOT.

Judge W. H. Snead had the misfor-
tune to stick a nail in his foot, on
Sunday last, which laid him up for
several days. He is having considera-
ble suffering and trouble.

BACK TO PEN FOR LIFE.

"Duck" Johnson, who was sent to
the Pen some ten years since, for the
killing of Harry Moredecal, for life,
was paroled last February, by the ef-
forts of Mr. John C. Mastin (the farm-
ing implement merchant).

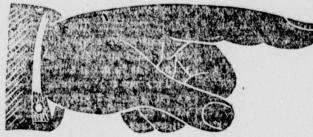

Last week Johnson "got in bad" in
the classic precincts of Craw, and
was arrested and fined for fighting
and having a concealed weapon on
board.

On Tuesday the Prison Board issued
an order for Johnson's reincarceration
in the Prison to spend the rest of his
life.

Another illustration of what "wine
and women" will do for a man.

Since his release Johnson had
worked very steadily and acceptably
for his old employer. But could not
stand the temptations of Craw.

The Judge was exhibiting a hole in his hat made by a bullet fired from a pistol in the hands of the little fellow, who being taunted by the Judge with not being able to shoot, showed him how near he could come to the top of his head without breaking the skin.

REST MADE EASY.

There Will be Less Sleeplessness When Frankfort People Learn This.

Can't rest at night with a bad back, A lame, a weak or an aching one, Doan's Kidney Pills are for bad backs.

They care every form of kidney ill, They are endorsed by Frankfort people.

Mrs. C. V. Webber, of 426 High St., Frankfort, Ky., says: "The dragging down pains in the small of my back were terrible. At night, I suffered most and fairly dreaded to go to bed for the aching after I lay down was really more than I could endure. I could hardly lie on my back at all, and if I attempted to turn to either side sharp twinges caught me in the small of my back, and as a result I have lain awake for hours suffering torture. I awoke this morning more tired than when I retired. There was also a weakness of the kidneys, the secretions being irregular and distressing, which had bothered me ever since I was a child. Not until I learned of Doan's Kidney Pill and procured a box at J. W. Gayle's drug store was I able to find anything that would give me relief. The use of this remedy gradually lessened the aching until it stopped and good, sound, refreshing sleep followed. The difficulty with the kidney secretions was also greatly relieved. As a result my health became considerably better than it had been for months before I commenced the use of Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N.Y., sole agents for the United States.

Remember the name—Doan's—and take no other.

FELL THROUGH SEWER CAP.

As the horse of the Rupert Grocery Co. was being led to their wagon to be hitched up, after the rain, on Thursday, it stepped on the top of the sewer, which slipped to one side, precipitating the hind quarters of the animal into the sewer. After considerable work it was finally rescued and was not very seriously hurt, although bruised.

SPLENDID RAIN.

On Thursday, shortly after one o'clock, this city and vicinity was visited by a splendid rain, which continued to pour down for more than an hour. All nature was refreshed and smiled again.

Te Deum laudamus.

OUR INVARIABLE RULE.

It is our INVARIABLE RULE that all communications, in order to obtain publication in our paper, shall be accompanied by the name of the author, not for publication, but so that we may have authority for anything appearing in our columns. This is especially the case where the matter contained in the communication is of such a character as likely to produce controversy.

We have had several communications lately that contained matter that was good; and, had the author given his name, we would have published same. But, owing to this rule, they were consigned to the waste basket.

We would call especial attention to this just now, for many reasons, but this is enough.

ATTENTION, CITY AUTHORITIES!

A number of the best citizens of South Shelby street request us to call the attention of the city authorities, and the City Engineer, to the condition of that street, from Todd street south. It has been cut up so badly by the heavy hauling to the new capital grounds that it is almost impossible for any kind of vehicle except the heaviest and strongest wagons.

Things have gotten in such bad shape that the dairymen are refusing to deliver milk to the housekeepers of that street, which is not only a great inconvenience, but a positive hardship, as there are quite a number of infants who are dependent upon them for sustenance.

Have it attended to!

NARROW ESCAPE OF STREET CAR.

On Saturday afternoon a car going south on the street car line jumped the track just after entering the St. Clair street bridge. It ran against a heavy beam on the side of the foot walk, on the west side of the bridge, and, swept it away; then, running against two steel uprights of the bridge, was brought up by them. Otherwise it would have jumped to the rocky shore of the river, some twenty or twenty-five feet below.

No one of the passengers or crew was hurt, the car but slightly damaged, and traffic was soon resumed.

Manager Sallee thinks some obstruction was placed on the track, which caused the car to perform the "circus act."

As the grade is pretty heavy extra power is always turned on as the cars make the rise to the center of the bridge.

A GOOD ORDINANCE.

The City Council has adopted, for the first time, an ordinance forbidding minors to loaf about or enter saloons, under a penalty of from \$10 to \$20 fine.

This is as it should be, and if it had been the law long ago many a fine boy would have been spared from a drunkard's grave.

ORPHAN BRIGADE TO MEET AT GLASGOW.

The meeting place for the famous Orphan Brigade, C. S. A., has been fixed at Glasgow, Barren county, the home of its last commander, the late Gen. Jos. H. Lewis.

The date will be on Saturday, September 21st.

Consumption is less deadly than it used to be.

Certain relief and usually complete recovery will result from the following treatment:

Hope, rest, fresh air, and—*Scott's Emulsion.*

ALL DRUGGISTS: 50c. AND \$1.00.

PROGRESS AND VALUE OF TREE PLANTING.

Reports from all parts of the country show that the past season has undoubtedly been characterized by a more extensive planting of forest trees than any previous year in the United States. The work is progressing very favorably in every State in the Union.

It has been most extensive in California, in the great Middle West and in the New England States. But even in the South, where planting has been more or less limited because of existing natural forests, the scope of the work has greatly broadened.

The trees planted have been mainly hardwoods. Several large nurseries, however, report greater sales of confers for forest planting than they have ever made before. In the Middle West catalpa, black locust, Osage orange and Russian mulberry were the favorite trees; in the North and northeast preference was given to white pine, chestnut, larch and spruce and in the South the native conifers held the lead, and in California, where the immense annual planting area has been increased to at least five times its former size, eucalyptus had practically a monopoly.

A few figures readily show the value of forest planting from a commercial standpoint. In Pawnee county, Neb., a 16-year-old catalpa plantation gave a net return of \$152.17 per acre at the time the plantation was cut. This meant an annual profit of \$6.24 per acre. A 10-year-old plantation of the same species in Kansas showed a net value of \$197.55 per acre. Still another plantation, in Nebraska, gave a net income of \$179.50 per acre when 14 years old, which amounts to an annual income of \$8.69 per acre. Several equal striking cases could be cited throughout the entire Middle West, and it is known that where the catalpa will succeed no other tree will pay so well. Good soil and moisture conditions are, however, essential for success with this tree.

Osage orange has been known to produce as high at 2,640 first-class posts and 2,272 second-class posts per acre, and it is well understood that no posts are better than those of Osage orange.

Larch producing such a forest as this could hardly be put to a better use, since timber is the easiest of all crops to raise and from now on will never go begging for a market. Red cedar in plantations 25 years old has reached a value of \$200.54 per acre.

European larch, used for fence posts or telephone posts reaches an average value of \$200 to \$300. White pine plantations 40 years old have exceeded a value of \$300 per acre, and it is known that the eucalyptus, even when grown for fuel alone, can compete as to profits with oranges. It does not take a lifetime to get results. Catalpa often reaches a post size in from eight to ten years, and will give service as a post for from fifteen to forty years. Osage orange, which reaches post size in from twelve to fifteen years, usually lasts longer than catalpa. Black locust, though badly affected by the borer in some regions, grows about as fast as the catalpa, and has almost the same post value, while it has the great advantage over catalpa of being able to thrive on poor land. European larch reaches a size suitable for telephone poles in twenty-five years. When treated with preservative it will then last from fifteen to twenty-five years. Eucalyptus makes a very heavy yield of fuel in seven years, and the crop should nearly always be cut before ten years. On favorable sites white pine will make saw timber in from forty to sixty years. Already the demand for the timber of this tree shows conclusively that the investment will undoubtedly prove very profitable.

In every region of the United States there is at least one forest tree and generally there are several forest trees, which can be planted with a

complete assurance of commercial success if the plantation is properly established and given proper care. The government has made a very careful study of most of the forest plantations in the United States. Its publications on tree planting may be had free of charge upon application to the Forest Service, U. S. Department of Agriculture, Washington, D. C.

The studies on which they were based were made especially for the benefit of the farmers and other owners, and to prevent the waste of many thousands of dollars annually lost by planting the wrong forest trees or by improper care of plantations.

From the manner in which our natural timber has been cut it is clear that each region will have to be made as nearly self-sufficient in timber growth as possible. The lesson of the past is that the right forest trees grown in the right way will bring a big profit.

THE LIMIT OF LIFE.

The most eminent medical scientists are numerous in the conclusion that the generally accepted limitation of human life is many years below the attainment possible with the advanced knowledge of which the race is now possessed. The critical period, that determines its duration, seems to be between 50 and 60; the proper care of the body during this decade can not be too strongly urged; carelessness then being fatal to longevity. Nature's best helper after 50 is Electric Bitters, the scientific tonic medicine that revitalizes every organ of the body. Guaranteed by all druggists. Price 50 cents.

STREET CAR JUMPS TRACK.

Another street car jumped the track at the north end of the St. Clair street bridge, on Wednesday night (at the same place the accident occurred Saturday evening).

The car smashed the wooden sidewalk and was only stopped by the steel uprights of the bridge.

Motorman Polsgrove and a colored man by the name of Martin Boyd were bruised up, but not seriously.

ARM BROKEN.

While riding a bicycle, on Monday Robert Nichols, son of Mr. John D. Nichols, of the Frankfort Shoe Co., collided with a tree, on Fourth Avenue, breaking his left arm at the elbow. Surgical attention was rendered and the lad is doing as well as could be expected.

Sergeant D. C. Wright, of Covington.

Private W. C. Lamb, of Covington.

KINNEY—In Lexington, on Monday, Mr. M. B. Kinney, aged about 45 years, of softening of the brain, after a long illness.

Mr. McKinney was a brother-in-law of Mr. B. Todd Crutcher and Mr. Jas. W. Shackelford, of this county.

He leaves a wife and two children (one daughter and a son) to mourn his untimely end.

The remains were brought here on Wednesday for interment in our cemetery.

COMMUNICATION.

Frankfort, Ky., Aug. 13, 1897.

Mr. Editor.—In the last issue of your paper you gave the names of several of the prisoners from this place who were captured along with Maj. Gaines, Capt. Cassius M. Clay, etc. You gave the information as coming from me, as taken from a clipping of the Baltimore Sun sent me by Mr. J. A. Kemp, of Bowling Green, Ky. The said paper was printed May 24, 1847, more than sixty years ago. Mr. Kemp writes his mother kept it for him until his return home.

I go in correspondence with Mr. Kemp through Judge Settle, of the Court of Appeals. He writes me he is the only one of the prisoners living to his knowledge. The rest all having passed over to the other side.

I think it due Mr. Kemp that he should have the honor, if any there is, for this information. I certainly feel thankful to him for it, and do not wish to appear as wishing the credit of the clipping referred to.

I will say these prisoners referred to were captured by the advance of Gen. Santa Anna's army, but a short time before the battle of Buena Vista.

Sad Capt. Danley referred to made his escape on Maj. Gaines' horse, when he got to Saltillo after a hard chase of sixty or seventy miles. Our company left a few days after to guard Gen. Wm. O. Butler to Camargo, on his way home to the mouth of the Kentucky river, he having been badly wounded at the battle of Monterey, some time previous.

The battle of Buena Vista came off a short time after we left. There were eight of our company, commanded by Capt. Thos. F. Marshall, in the battle. Three out of the eight men were wounded.

Of Capt. E. C. Millam's company, Frank Chambers, from this place, our company being from Woodford county, consisting of almost three hundred, but seven are alive, including myself.

Yours truly,
JOHN E. MILES.

"ALL DEALERS"

COMMUNICATED.

Editor Roundabout:

We hear a good deal lately about "giving Taylor immunity" if he would testify in the Powers case. With your permission I would like to ask a question or two about "immunity."

What authority has any one to offer "immunity"? What would it amount to if offered? Could not any officer who wished to arrest Taylor, so soon as he stepped on Kentucky soil, notwithstanding the "immunity" and claim the \$5,000 reward?

It strikes a plain man that the only "immunity" that will hold water, is for Col. Franklin to enter a nolle prosequi, and then Taylor could come without any fear of treachery.

JUSTICE.

Another human life was snuffed out by the waters of Kentucky river, on Thursday afternoon.

It seems that a party composed of Eph Lillard, Jr., Harry Keifer and Arthur Nelson (who were camping near Turkey Run, on the river), were out to a skiff, when they commenced rocking the boat, which was upset and all three men precipitated into the water.

The other two men succeeded in reaching the bank but Nelson was drowned.

The body was recovered about 11 o'clock that night by Mr. Josh Warren (an experienced hand at the business), and brought to the undertaking establishment of Coroner Graham, an inquest was held and the body prepared for burial.

Nelson is a glass blower from Anderson, Ind., and was awaiting the opening of the works. His friends at Anderson were notified.

NOTICE TO NON-RESIDENT.

SAD SUICIDE.

Mrs. Louis Oliver, a resident of the West Side, committed suicide by jumping into the river, at the mouth of Benson, on Thursday morning, at 2 o'clock. The body was shortly afterwards recovered, an inquest held by Coroner Graham and a verdict returned in accordance with the facts.

Mrs. Oliver had been an invalid for a long time, and it is supposed that this caused the rash deed. She was, before her marriage, Miss Millie Zook, a daughter of the late Mr. John Zook, and was a handsome and attractive girl.

She leaves one sister and two brothers; besides her husband and two grown daughters to mourn her untimely death.

She was a member of the Methodist Church. The funeral and burial took place on yesterday afternoon.

THE STATE COLLEGE OF KENTUCKY, LEXINGTON, KY.

A PRACTICAL EDUCATION.

The Training of Mechanical and Electrical Engineers in Kentucky.

The State College of Kentucky offers the following courses, namely: Agriculture, Mechanical Engineering, Civil Engineering, Mining Engineering, Electrical Engineering, Normal School, Classical and seven Scientific courses, each of which extends over four years and leads to the Bachelor's degree. Each course is organized under a separate faculty. The general faculty, consisting of professors, assistant professors and instructors, number over fifty.

County appointees receive free tuition, privilege of residence in dormitories, fuel and lights and traveling expenses, if they remain ten consecutive months, or one collegiate year. The laboratories and museums are large, well equipped, comprehensive and modern. Military Science is fully provided for as required by Congress.

Graduates in the several courses of study readily find employment with liberal remuneration. The total number of matriculates last year was 901. Each department has a specialist at its head, with the necessary number of assistants.

Summer schools are provided for in Pedagogy, Engineering and Instruction in Science and the Liberal Arts.

The young women find an excellent home, with board and lodging, in Patterson Hall, which is well equipped with all modern conveniences, bath-rooms, hall for physical culture, at \$3 per week. All the courses of study in the college are open to young women upon identical conditions with those applying to males.

The attendance upon the Normal School in connection with the Department of Education last year more than doubled that of any preceding year.

The new buildings, namely, one for the Department of Education, one for Agricultural Science, and a Library Hall, are in process of erection and will be completed early in the next collegiate year.

For Catalogues, methods of obtaining appointments, information regarding courses of study and terms of admission, apply to

We take the following excellent article from the State College Bulletin:

The successful man of today is one who has an education that has a market value. This applies to all classes of men. The writer, the lawyer, the surgeon, the merchant, and the engineer can measure his value to the world largely by what men are willing to pay for his services. The conception of an education has been greatly modified in recent years. A man is educated who is skilled in doing some useful thing; who manifests an interest in all men engaged in useful work, and who is always striving to be more skillful and better informed in his own work. The beauties of art, literature and philosophy do not belong to any class of men. The man who is engaged in productive work should find first that culture that comes from doing his work well, but his happiness and breadth of life will be increased if he finds some of the gems in the world of literature and art.

The technical school is responsible to a large degree for the present status of the science of engineering. Machines today are built by men well versed in the refinements of mechanical engineering. The great industries of this country are continually looking for young men who have a scientific training in the art of machine designing and power transmission. The steam engine presents each year new possibilities, and the evolution in this direction has recently taken shape in the steam turbine. The gas engine is in the formative period and the allowable use of denatured alcohol will stimulate the use of this power. The recent large uses of available water power, and the growth of the interurban railway lines offer great possibilities to the highly trained mechanical engineer.

Kentucky has not been slow to recognize the fact that she must provide for her sons a great school in mechanical and electrical engineering in order to equip them for a work that offers large opportunities in this age of industrial achievement. For fifteen years the State College of Kentucky has been sending her mechanical and electrical engineers to all parts of the country where they have achieved great distinction with the largest machine, engine and electrical apparatus building concerns. Kentucky boys have made such a record that there is a demand for State College mechanical and electrical engineers that cannot be supplied. In the class of 1907 there were thirty men and there were over one hundred applications for these graduates. There were eleven applicants for State College men to take up teaching work in mechanical and electrical engineering in some of the best known universities in this country. The class of 1907 all secured good positions. No State in the Union makes such liberal concessions to her young men to gain an education as does Kentucky. A county appointed student not only gets his tuition, maintenance fees and room rent free, but the Legislature has actually provided that he receive his traveling expenses from his home to the college and return. The expenses for any resident of the State, whether he be appointed or not, are reduced to a

minimum. Every young Kentuckian should recognize that the State has put at his command the means of obtaining an education in mechanical and electrical engineering that is second to none. He should further appreciate the fact that the State is making provisions that would cost each student at least two hundred dollars a year for tuition should all the expenses of his training be gotten in State-supported school by State or Federal aid.
